説明

The invention relates an umbrella capable of opening with car door. This umbrella is installed on the top of a car and can open the umbrella by opening the door. A driver happen to it's rainy during he drive, simultaneously he don't need to prepare the umbrella or place the umbrella in the truck, by this device, the driver open the door to go out, simultaneously the umbrella is pulled a preset position to open and protect the user from rain. The user also takes the umbrella apart to use for avoiding to get wet in the rain.
